PROFESSIONAL SUMMARY

Full-stack **Software Development Engineer** (B.Tech CSE, AI & ML, 2027) with internship experience building **scalable server-side architecture** and **RESTful APIs** serving **500+ daily users at 99.9% uptime**. Builds with **Node.js, TypeScript, JavaScript, React.js, Next.js, Tailwind CSS** and **SQL (PostgreSQL, MySQL)**. Strong in **API design, database optimization** and **web performance**, with hands-on **AWS, Docker** and **Git**. Takes ownership, learns fast and enjoys fast-paced, startup-style teams.

WORK EXPERIENCE

Software Development Engineer Intern — InAmigos Foundation

Jan 2026 – May 2026 | Chennai

- Designed and built **scalable server-side architecture** and **RESTful APIs** (Python, Flask) supporting **500+ daily active users at 99.9% uptime**.
- Resolved performance **bottlenecks** by optimizing **SQL queries**, data pipelines and load distribution, achieving **sub-200ms response times** on high-traffic endpoints.
- Owned an AI-powered inventory system **end to end**, from requirements to deployment, improving query accuracy by **40%**.
- Automated** manual inventory workflows, saving **10+ hours of manual effort per week**.

PROJECTS

[MERN Amazona — Full-Stack E-Commerce Platform](#) | Next.js, React, Node.js, Tailwind CSS, Prisma, SQL | [GitHub](#)

- Built an Amazon-style store with **Next.js (React)** and **Tailwind CSS**: product listing and search, cart, checkout, orders and user profiles.
- Built the backend on **Next.js API routes (Node.js)** without Express, and tested **10+ REST endpoints** with **Postman**.
- Added **JWT** login and registration with **Prisma ORM** on **PostgreSQL/MySQL**, keeping **100% data integrity** and cutting query latency by **15%**.
- Built an **admin dashboard** for products, orders and users; **lazy loading** gave **20% faster page loads** for **50+ concurrent users**.

[Smart Meeting Assistant Agent](#) | Python, Agno, LLMs, Linear API, Slack API, Streamlit | [GitHub](#)

- Built an **AI agent** with the **Agno** framework and LLMs (Nebius API) that turns raw meeting notes into summaries of decisions and next steps.
- Integrated the **Linear API** to auto-create tasks from meeting discussions, cutting follow-up time by **40%**.
- Connected a **Slack bot** to post meeting summaries and alerts to the team channel in real time.
- Built a **Streamlit** web UI with chat input and secure API-key entry; managed dependencies with **uv**.

[AI-Powered Fashion Recommendation System](#) | Python, TensorFlow, ResNet, Nearest-Neighbor Search | [GitHub](#)

- Trained a **ResNet** classifier in **TensorFlow** on DeepFashion (**289K+ images**, 50 categories), reaching **85%+ accuracy**.
- Wrote a modular pipeline: dataset preprocessing, training-time image processing, configurable hyperparameters, and train/test scripts.
- Used the model's feature layer to capture fine-grained **fabric, style and pattern** features.
- Built a **nearest-neighbor** recommender with **sub-100ms inference** and **sub-second retrieval**.

[Myntra Returns-Reduction Analysis](#) | Power BI, Excel | [GitHub](#) | [Live Dashboard](#)

- Analyzed **10K+ Myntra sales records** (Kaggle) in **Power BI** and **Excel** to tackle high product return rates.
- Wrote the **business requirements** and defined KPIs for revenue, orders, sales amount and total products.
- Built an interactive dashboard: top brands by revenue, daily sales by category, and sales across **20+ states**.
- Found size/fit issues driving returns, projecting a **15% drop in return rate**; **published the dashboard live** on NovyPro.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, C++, HTML/CSS

Frontend: React.js, Next.js, Tailwind CSS, Streamlit

Backend: Node.js, Next.js API Routes, Flask, Spring Boot, REST API Design and Documentation, JWT Authentication, Prisma ORM

Databases: MySQL, PostgreSQL, MongoDB, Database Optimization

Cloud & DevOps: AWS (Lambda, ECS, EKS, CloudWatch), GCP, Docker, Kubernetes, Jenkins, Kafka, RabbitMQ

Tools: Git, GitHub, GitLab, Postman, Grafana, Splunk

EDUCATION

SRM Institute of Science and Technology — Kattankulathur, Chennai

Aug 2023 – May 2027

B.Tech in Computer Science and Engineering (Artificial Intelligence and Machine Learning) | **CGPA: 8.65/10**

Relevant Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, Database Management Systems, Object Oriented Design and Programming, Advanced Programming Practice, Operating Systems, Computer Networks, Software Engineering and Project Management

CERTIFICATIONS

- AWS Certified Developer – Associate** | **AWS Certified Cloud Practitioner** (2025)
- Oracle Certified Professional: MySQL 8.0 Database Developer** | **MongoDB Associate Developer (Node.js)**
- Meta Back-End Developer Professional Certificate** | **OCI Generative AI Professional** (2026)
- Microsoft:** Azure Fundamentals AZ-900 (2025), Azure AI Fundamentals AI-900, Power BI Data Analyst PL-300, Excel | **Google Data Analytics**
